

**JUST
HOUSING**

Ready-to-build Zero Net Energy

**Design that's good for the people and good for the planet:
livable, accessible solar-powered homes.**

JUST HOME Designs

- Clean building forms with gracious covered porches and entry spaces
- Spacious and flexible interior layouts
- Optimized for health, efficiency and comfort
- Adaptable to different site conditions

Our Standardized Construction Assemblies

- A robust, straightforward, and proven approach to high performance building
- Comprehensive, thoroughly detailed plans and specifications
- Durable, cost-effective, and readily available materials
- Engineered to require 75% less energy than equivalent-sized homes built to code

Our Mechanical, Electrical and Plumbing Systems Approach

- Low building energy loads allow for smaller equipment, smaller ductwork and simple zoning
- Entirely electrically powered, with no fossil fuels burned on site.
- All-electric appliances provide efficient operation without compromising indoor air quality.
- Features: high-efficiency cold climate air source heat pump for heating and cooling, whole house mechanical ventilation system, heat pump water heater, whole house energy monitor
- A grid-tied solar energy system can bring the house to net zero energy consumption.
